

MOTO GUZZI

The Complete
Story

V-Twins

Mick Walker

Over almost eight decades, Moto Guzzi has built just about every engine configuration possible: singles, twins, triples, fours and even a V-8. However, for the last three decades one engine layout has dominated the Italian company's activities on both road and track – the 90-degree V-twin.

Best selling author Mick Walker charts the full history of this unique family of motorcycles, drawing upon his vast experience of the Italian industry, both as a dealer and importer.
